TABLES

Expenditures for hired labor, classified by total value of farm products, for the United States and divisions: 1930.....	160
Expenditures for commercial fertilizer, liming materials, feed, and implements and machinery, classified by total value of farm products, for the United States and divisions: 1939.....	166
Expenditures for gasoline, distillate, kerosene, and oil; and for building materials; classified by total value of farm products, for the United States and divisions: 1939.....	172
Expenditures for hired labor, classified by total value of farm products, by divisions and States: 1939.....	176
Expenditures for commercial fertilizer, liming materials, feed, and implements and machinery, classified by total value of farm products, by divisions and States: 1939.....	180
Expenditures for gasoline, distillate, kerosene, and oil; and for building materials; classified by total value of farm products, by divisions and States: 1939.....	196

(158)

Specified Farm Expenditures¹

The data contained in this chapter are tabulated by value-of-products groups for each geographic division. State data are shown for two groups of farms, those whose value of production was below \$10,000, and those with products valued at \$10,000 and over. The tabulations of these items of expenditure have not previously been published by value-of-products groups.

EXPENDITURES FOR FARM LABOR

Of all farms in the United States, 37 percent reported expenditures for hired labor in 1939. By classes of employment, 24 percent of the farms hired labor by the day or week; 10 percent by the month; and 12 percent on some other basis, such as contract, piece work, or by the hour.

Some labor was hired on farms in the lowest-value group, 12 percent of the farms in the \$1 to \$99 group reporting these expenditures. By geographic divisions, the percentage reporting expenditures for labor in this value group was lowest, 9 percent, in the East South Central and East North Central Divisions, and highest, 21 percent, in the Pacific Division. The proportion hiring labor increased with an increase in value of products, and included 92 percent of the farms with products valued at \$10,000 and over. Between geographic divisions there was more variation in the proportion hiring labor in the lower-value-of-products groups than in others. For the \$100 to \$249 group the proportion hiring labor ranged from 12 percent in the East South Central Division to 26 percent for the Pacific Division. For the group from \$6,000 to \$8,000 the proportion varied from 83 percent in the West North Central Division to 92 percent in the New England, South Atlantic, West South Central, Mountain, and Pacific Divisions.

The proportion of farms reporting labor hired by the month was very low for the lower-value-of-products groups, representing about 2 percent of all farms in value groups below \$400. Only 7 percent of all farms reporting expenditures for labor hired by the month, 14 percent of all farms reporting labor hired by the day or week, and 14 percent of all farms reporting labor hired in other ways were in value groups below \$400. The proportion of farms in these 3 value groups reporting labor hired by the day or week ranged from 7 to 13 percent, and the corresponding proportions reporting such types of employment as contract labor and piece work were about one-half as large.

In the New England, Middle Atlantic, Mountain, and Pacific Divisions the average expenditure for labor per farm reporting, in the lower-value-of-products groups, was considerably above the United States average for these groups. For these divisions, the average wages paid per farm reporting in the \$1 to \$99 value group was \$104 or more. In other words, farms in this value group which hired labor, paid out more, on the average, for farm labor than they could have received from the sale, trade, or home use of farm products.

Farms with low value of production find it necessary to hire labor for a number of reasons. Many farms, particularly in the lowest-value group, are not commercial farms, and labor expenditures frequently represent the hire of caretakers, gardeners,

¹The figures for expenditures are based on a 2-percent sample of farms in the value-of-products groups below \$10,000, but are complete tabulations for all farms with products valued at \$10,000 and over.

and the like on rural residences. Census data indicate that elderly persons make up a large proportion of the operators of farms in the lower-value groups. If production on these farms is to be comparable to that of young operators' farms additional hired labor may be needed. Also, the proportion of operators working off their farms and the average number of days of off-farm work per operator reporting are higher in the low-value groups than in other groups. It is probable that many in the low-value groups find it advantageous to work away from their farms and hire labor for some of the farm work. In any year, a few medium- and large-scale farms will fall into the low-income category because of crop failure, yet their expenditures for labor may be considerable. Also new farms, in the process of development, often show considerable expenditures for labor for such purposes as land clearing, construction of fences, buildings, and the like.

The amount paid for wages is concentrated in the higher-value-of-products groups to a much greater extent than is the number of farms reporting labor hired. Approximately, 75 percent of the farms reporting payments for labor hired are in the value groups above \$600, which include 51 percent of the farms, but 75 percent of the amount paid for the hire of labor is included in the value groups above \$2,000, which represent only 16 percent of the total number of farms. This general situation is found in all geographic divisions.

Wages paid per farm reporting labor expenditures averaged \$90 for the \$1 to \$99 value group, \$278 for the \$2,000 to \$2,499 group, and \$4,530 for farms with products valued at \$10,000 and over. If the average outlay for farms in the different value groups is expressed as an average for all farms, including those which did not hire any labor, the figures for the groups mentioned above are \$10, \$180, and \$4,174, respectively.

FEED

In 1939, farmers in the United States bought feed for livestock in an amount that averaged \$119, which was about 11 percent of the value of products. About one-half the farmers reported feed purchased, with an average expenditure of \$219 per farm.

The average amount for farms reporting the purchase of feed varied from \$74 in the East South Central Division to \$613 in New England. In general, the proportion of farms purchasing feed increased with an increase in the value of products.

In the New England and Middle Atlantic Divisions many producers of milk and eggs expect to buy all of their grain feed for cows and poultry and many producers of field crops, fruits, and vegetables buy feed for workstock rather than produce it. Elsewhere the purchase of feed largely represents a current adjustment of feed supply to the needs of the livestock kept.

In the general farming areas of the North Central Divisions many farmers raise crops of high value per acre for sale and buy high-protein millfeed for hogs and cattle. In those divisions the sums spent by those buying feed are relatively small on all farms except on small farms specializing in some kind of livestock. In the southern States, where livestock production is more limited than elsewhere, most farmers expect to raise

feed for workstock and for the cattle, hogs, and chickens they may keep for home use. The average sums spent for feed in the South Atlantic and East South Central Divisions were small for farms with value of products under \$1,000, considerably more than one-half of the farms in each of the lower-value groups reporting no expenditures for feed.

In the Mountain and Pacific Divisions feed purchases are common in all but the lowest-value-of-products groups, but are moderate on all farms except those definitely organized to feed out livestock or to produce livestock products, including poultry.

IMPLEMENTS AND MACHINERY

The expenditures for implements and machinery, reported at \$326 per farm for the 28 percent of farms that made purchases in 1939, were about 18 percent of the reported value of implements and machinery on farms at the date of the census. The amount and its percentage suggest moderate progress on replacements and normal extensions after the long period of "doing without." Most of the money was spent by the farmers with value of products of \$1,000 or over.

Expenditures per farm were lowest in the East South Central States, \$146, though the South Atlantic States also spent little money per farm, \$160. In the South Atlantic Division only 19 percent of the farms with value of products less than \$1,000 reported any implements bought in 1939. The average annual need for tools in this group was about \$15, if the \$80 spent by those who reported tools bought can be taken as a fair representation of the practices and the circumstances of the operators in these value groups.

EXPENDITURES FOR GASOLINE, DISTILLATE, KEROSENE, AND OIL

The average amount reported spent for gasoline, distillate, kerosene, and oil in 1939 was \$112 per farm reporting this item or \$53 per farm on the basis of all farms. Only in the West North Central, Mountain, and Pacific States did the average for all farms approach \$100 per farm. In most of the divisions the bulk of the expenditures were made by farms in the higher-value groups. These large-farm businesses had most of the tractors, motortrucks, and irrigation-pumping outfits using liquid fuels, although a considerable number are owned by small farmers who do custom work and hauling. In view of the number of farms that reported automobiles and motortrucks (even among the groups with a low value of products), compared with the number reporting expenditures for motor fuel and oil, it seems likely that many of the farmers who had cars or motortrucks, or both, considered the fuel for operating these machines as nonfarm expense and did not include that amount in their replies to the census enumerators. On the other hand, the reported expenditure of \$32 for motor fuel and oil on farms in the \$1 to \$249 value groups suggests that some purchases of fuel and oil for nonfarm use have been included.

BUILDING MATERIALS

Nearly one-third of the farmers enumerated in the Census of 1940 reported expenditures during 1939 for lumber, hardware, and other building supplies. The amounts were small among farmers in the lower-value-of-products groups, where the size of the expenditures exhibits rather little direct relationship with the type of farming and size of farm. The reports did not indicate the purpose of the expenditures but it is known that in 1939 new construction, especially of dwellings and other family conveniences, had been rather more liberal than for many years

previous and that expenditures for maintenance of buildings, other than dwellings, were probably consistent with the expanding volume of farm business. The amount expended related to payments for materials rather than to the investment value of the facilities provided or improved by the outlay.

COMMERCIAL FERTILIZER

Commercial fertilizer was purchased by 38.3 percent of the farmers who bought an average of 3 tons at a cost of \$84 per farm. Nearly half of the fertilizer was purchased by farmers of the South Atlantic States where 78 percent of the farms reported the purchase of an average of 4 tons each, at a total cost of \$111. The average amount purchased per farm was 5.7 tons by farmers in the Pacific Division, where, however, only 17.4 percent bought any in 1939. Farm operators in the New England and Middle Atlantic Divisions were heavy users of commercial fertilizer, reporting 4.6 and 4.2 tons purchased per farm, respectively. As was to be expected, the use of fertilizer was associated with crop production and was smallest on farms with the lowest values of production, but no value group appears without farms for which fertilizer was purchased. In the divisions that had heavy livestock production the availability of animal manures reduced the need for commercial fertilizer, both among the farmers who buy none, as a matter of course, and among those who find it profitable to buy fertilizer to promote growth of special crops.

LIMING MATERIALS

The Census of 1940 for the first time carried a separate question with respect to purchase of lime. The figures in this release show the quantities of liming materials purchased in 1939. The average quantity purchased was 18 tons by those reporting. No value group was too small to show some expenditures for lime, though farms in the higher-value groups naturally bought more than in the smaller groups. Largest purchases were reported from the North Central Divisions—31 tons per farm reporting. There is considerable overlapping between farms reporting use of fertilizer and lime, because of the advisability of using both fertilizer and lime in preparation for new seedings.

ALL SPECIFIED EXPENDITURES

The items of expenditure enumerated do not by any means account for all cash expenditures of farmers. Many important items, including livestock purchases, insecticides, repairs to machinery, taxes, charges for irrigation water, insurance, interest payments, and others are not included. The proportion which the specified expenditures are of all cash expenses will vary by types and sizes of farms, and from one year to another. The data given are not adequate to be used in conjunction with the gross value of production to arrive at any estimate of net farm income, and should not be so used.

It is interesting, however, to compare the total of the specified items of expense with the total value of farm products sold, traded, and used at home in the lower-value-of-products groups. For the \$1 to \$99 group these expenditures were 128 percent of the gross value of farm products, and for the \$100 to \$249 group, 51 percent.

For the \$250 to \$749 value groups, these expenses were a gradually decreasing proportion of the value of farm products; above \$750 the ratio between these expenses and gross value of products increased gradually.

In view of the fact that the expenditures enumerated were only a part of total farm costs, it is evident from the high

ratio of expenditures to value of production in the 2 lowest-value groups, that these groups must contain many units that are not commercial farms, including country places and rural

residences. Furthermore, some medium- and large-scale farms would be in these groups because of crop failure in 1939, or because they were new units being developed.

The data in Table 10 show the distribution of farms by value of products.

The first group contains 1,000 farms with a value of products

of \$1,000 or less per year.

The second group contains 1,000 farms with a value of products

of \$1,001 to \$2,000 per year.

The third group contains 1,000 farms with a value of products

of \$2,001 to \$3,000 per year.

The fourth group contains 1,000 farms with a value of products

of \$3,001 to \$4,000 per year.

The fifth group contains 1,000 farms with a value of products

of \$4,001 to \$5,000 per year.

The sixth group contains 1,000 farms with a value of products

of \$5,001 to \$6,000 per year.

The seventh group contains 1,000 farms with a value of products

of \$6,001 to \$7,000 per year.

The eighth group contains 1,000 farms with a value of products

of \$7,001 to \$8,000 per year.

The ninth group contains 1,000 farms with a value of products

of \$8,001 to \$9,000 per year.

The tenth group contains 1,000 farms with a value of products

of \$9,001 to \$10,000 per year.

The eleventh group contains 1,000 farms with a value of products

of \$10,001 to \$11,000 per year.

The twelfth group contains 1,000 farms with a value of products

of \$11,001 to \$12,000 per year.

The thirteenth group contains 1,000 farms with a value of products

of \$12,001 to \$13,000 per year.

The fourteenth group contains 1,000 farms with a value of products

of \$13,001 to \$14,000 per year.

The fifteenth group contains 1,000 farms with a value of products

of \$14,001 to \$15,000 per year.

The sixteenth group contains 1,000 farms with a value of products

of \$15,001 to \$16,000 per year.

The seventeenth group contains 1,000 farms with a value of products

of \$16,001 to \$17,000 per year.

The eighteenth group contains 1,000 farms with a value of products

of \$17,001 to \$18,000 per year.

The nineteenth group contains 1,000 farms with a value of products

of \$18,001 to \$19,000 per year.

The twentieth group contains 1,000 farms with a value of products

of \$19,001 to \$20,000 per year.

The twenty-first group contains 1,000 farms with a value of products

of \$20,001 to \$21,000 per year.

The twenty-second group contains 1,000 farms with a value of products

of \$21,001 to \$22,000 per year.

The twenty-third group contains 1,000 farms with a value of products

of \$22,001 to \$23,000 per year.

The twenty-fourth group contains 1,000 farms with a value of products

of \$23,001 to \$24,000 per year.

The twenty-fifth group contains 1,000 farms with a value of products

of \$24,001 to \$25,000 per year.

The twenty-sixth group contains 1,000 farms with a value of products

of \$25,001 to \$26,000 per year.

The twenty-seventh group contains 1,000 farms with a value of products

of \$26,001 to \$27,000 per year.

The twenty-eighth group contains 1,000 farms with a value of products

of \$27,001 to \$28,000 per year.

The twenty-ninth group contains 1,000 farms with a value of products

of \$28,001 to \$29,000 per year.

The thirtieth group contains 1,000 farms with a value of products

of \$29,001 to \$30,000 per year.

The thirty-first group contains 1,000 farms with a value of products

of \$30,001 to \$31,000 per year.

The thirty-second group contains 1,000 farms with a value of products

of \$31,001 to \$32,000 per year.

The thirty-third group contains 1,000 farms with a value of products

of \$32,001 to \$33,000 per year.

The thirty-fourth group contains 1,000 farms with a value of products

of \$33,001 to \$34,000 per year.

The thirty-fifth group contains 1,000 farms with a value of products

of \$34,001 to \$35,000 per year.

The thirty-sixth group contains 1,000 farms with a value of products

of \$35,001 to \$36,000 per year.

The thirty-seventh group contains 1,000 farms with a value of products

of \$36,001 to \$37,000 per year.

The thirty-eighth group contains 1,000 farms with a value of products

of \$37,001 to \$38,000 per year.

The thirty-ninth group contains 1,000 farms with a value of products

of \$38,001 to \$39,000 per year.

The forty-th group contains 1,000 farms with a value of products

of \$39,001 to \$40,000 per year.

The forty-first group contains 1,000 farms with a value of products

of \$40,001 to \$41,000 per year.

The forty-second group contains 1,000 farms with a value of products

of \$41,001 to \$42,000 per year.

The forty-third group contains 1,000 farms with a value of products

of \$42,001 to \$43,000 per year.

The forty-fourth group contains 1,000 farms with a value of products

of \$43,001 to \$44,000 per year.

The forty-fifth group contains 1,000 farms with a value of products

of \$44,001 to \$45,000 per year.

The forty-sixth group contains 1,000 farms with a value of products

of \$45,001 to \$46,000 per year.

The forty-seventh group contains 1,000 farms with a value of products

of \$46,001 to \$47,000 per year.

The forty-eighth group contains 1,000 farms with a value of products

of \$47,001 to \$48,000 per year.

The forty-ninth group contains 1,000 farms with a value of products

of \$48,001 to \$49,000 per year.

The fifty-th group contains 1,000 farms with a value of products

of \$49,001 to \$50,000 per year.

The fifty-first group contains 1,000 farms with a value of products

of \$50,001 to \$51,000 per year.

The fifty-second group contains 1,000 farms with a value of products

of \$51,001 to \$52,000 per year.

The fifty-third group contains 1,000 farms with a value of products

of \$52,001 to \$53,000 per year.

The fifty-fourth group contains 1,000 farms with a value of products

of \$53,001 to \$54,000 per year.

The fifty-fifth group contains 1,000 farms with a value of products

of \$54,001 to \$55,000 per year.

The fifty-sixth group contains 1,000 farms with a value of products

of \$55,001 to \$56,000 per year.

The fifty-seventh group contains 1,000 farms with a value of products

of \$56,001 to \$57,000 per year.

The fifty-eighth group contains 1,000 farms with a value of products

of \$57,001 to \$58,000 per year.

The fifty-ninth group contains 1,000 farms with a value of products

of \$58,001 to \$59,000 per year.

The sixty-th group contains 1,000 farms with a value of products

of \$59,001 to \$60,000 per year.

The sixty-first group contains 1,000 farms with a value of products

of \$60,001 to \$61,000 per year.

The sixty-second group contains 1,000 farms with a value of products

of \$61,001 to \$62,000 per year.

The sixty-third group contains 1,000 farms with a value of products

of \$62,001 to \$63,000 per year.

The sixty-fourth group contains 1,000 farms with a value of products

of \$63,001 to \$64,000 per year.

The sixty-fifth group contains 1,000 farms with a value of products

of \$64,001 to \$65,000 per year.

The sixty-sixth group contains 1,000 farms with a value of products

of \$65,001 to \$66,000 per year.

The sixty-seventh group contains 1,000 farms with a value of products

of \$66,001 to \$67,000 per year.

The sixty-eighth group contains 1,000 farms with a value of products

of \$67,001 to \$68,000 per year.

The sixty-ninth group contains 1,000 farms with a value of products

of \$68,001 to \$69,000 per year.

The七十-th group contains 1,000 farms with a value of products

of \$69,001 to \$70,000 per year.

The七十-first group contains 1,000 farms with a value of products

of \$70,001 to \$71,000 per year.

The七十-second group contains 1,000 farms with a value of products

of \$71,001 to \$72,000 per year.

The七十-third group contains 1,000 farms with a value of products

of \$72,001 to \$73,000 per year.

The七十-fourth group contains 1,000 farms with a value of products

of \$73,001 to \$74,000 per year.

The七十-fifth group contains 1,000 farms with a value of products

of \$74,001 to \$75,000 per year.

The七十-sixth group contains 1,000 farms with a value of products

of \$75,001 to \$76,000 per year.

The七十第七 group contains 1,000 farms with a value of products

of \$76,001 to \$77,000 per year.

The七十第八 group contains 1,000 farms with a value of products

of \$77,001 to \$78,000 per year.

The七十第九 group contains 1,000 farms with a value of products

of \$78,001 to \$79,000 per year.

The七十第十 group contains 1,000 farms with a value of products

of \$79,001 to \$80,000 per year.

The七十第十一 group contains 1,000 farms with a value of products

of \$80,001 to \$81,000 per year.

The七十第十二 group contains 1,000 farms with a value of products

of \$81,001 to \$82,000 per year.

The七十第十三 group contains 1,000 farms with a value of products

of \$82,001 to \$83,000 per year.

The七十第十四 group contains 1,000 farms with a value of products

of \$83,001 to \$84,000 per year.

The七十第十五 group contains 1,000 farms with a value of products

of \$84,001 to \$85,000 per year.

The七十第十六 group contains 1,000 farms with a value of products

of \$85,001 to \$86,000 per year.

The七十第十七 group contains 1,000 farms with a value of products

of \$86,001 to \$87,000 per year.

The七十第十八 group contains 1,000 farms with a value of products

of \$87,001 to \$88,000 per year.

The七十第十九 group contains 1,000 farms with a value of products

of \$88,001 to \$89,000 per year.

The七十第二十 group contains 1,000 farms with a value of products

of \$89,001 to \$90,000 per year.

The七十第二十一 group contains 1,000 farms with a value of products

of \$90,001 to \$91,000 per year.

The七十第二十二 group contains 1,000 farms with a value of products

of \$91,001 to \$92,000 per year.

The七十第二十三 group contains 1,000 farms with a value of products

of \$92,001 to \$93,000 per year.

The七十第二十四 group contains 1,000 farms with a value of products

of \$93,001 to \$94,000 per year.

The七十第二十五 group contains 1,000 farms with a value of products

of \$94,001 to \$95,000 per year.

The七十第二十六 group contains 1,000 farms with a value of products

of \$95,001 to \$96,000 per year.

The七十第二十七 group contains 1,000 farms with a value of products

of \$96,001 to \$97,000 per year.

The七十第二十八 group contains 1,000 farms with a value of products

of \$97,001 to \$98,000 per year.

The七十第二十九 group contains 1,000 farms with a value of products

of \$98,001 to \$99,000 per year.

The七十第三十 group contains 1,000 farms with a value of products

of \$99,001 to \$100,000 per year.

The七十第三十一 group contains 1,000 farms with a value of products

of \$100,001 to \$101,000 per year.

The七十第三十二 group contains 1,000 farms with a value of products

of \$101,001 to \$102,000 per year.

The七十第三十三 group contains 1,000 farms with a value of products

of \$102,001 to \$103,000 per year.

The七十第三十四 group contains 1,000 farms with a value of products

of \$103,001 to \$104,000 per year.

The七十第三十五 group contains 1,000 farms with a value of products

of \$104,001 to \$105,000 per year.

The七十第三十六 group contains 1,000 farms with a value of products

CENSUS OF AGRICULTURE: 1940

TABLE 1.—EXPENDITURES FOR HIRED LABOR, CLASSIFIED BY TOTAL VALUE

[Bold face figures are the 1940 Census recorded totals for all farms; all other entries are based upon a 2-percent sample of the reports for the individual farms, expanded products, based upon complete tabulations, see table 4. For

*Figures marked with asterisks have a coefficient of variation of approximately 10 percent or more, and may, therefore, be subject to sampling errors greatly in excess of that amount. See text.

CENSUS OF AGRICULTURE: 1940

TABLE 1.—EXPENDITURES FOR HIRED LABOR, CLASSIFIED BY TOTAL VALUE

[Bold face figures are the 1940 Census recorded totals for all farms; all other entries are based upon a 2-percent sample of the reports for the individual farms, expanded products, based upon complete tabulations, see table 4. For

DIVISION AND VALUE GROUP	EXPENDITURES FOR ANY HIRED LABOR ^a						EXPENDITURES FOR LABOR HIRED BY THE MONTH ^b					
	Farms reporting			Cash wages paid (dollars)			Farms reporting			Cash wages paid (dollars)		
	Number	Percent of total	Percent of all farms	Amount	Average per farm reporting	Percent of total	Number	Percent of total	Percent of all farms	Amount	Average per farm reporting	Percent of total

CENSUS OF AGRICULTURE: 1940

TABLE 2.—EXPENDITURES FOR COMMERCIAL FERTILIZER, LIMING MATERIALS, FEED, PRODUCTS,¹ FOR THE UNITED STATES

Bold face figures are the 1940 Census recorded totals for all farms; all other entries are based upon a 2-percent sample of the reports for the individual farms, expanded products, based upon complete tabulations, see table B. For

DIVISION AND VALUE GROUP	EXPENDITURES FOR COMMERCIAL FERTILIZER ²										EXPENDITURES FOR LIMING MATERIALS ³				
	Farms reporting			Quantity (tons)			Amount expended (dollars)				Farms reporting			Quantity (tons)	
	Number	Percent of total	Percent of all farms	Total	Average per farm reporting	Percent of total	Total	Average per farm reporting	Average per ton	Percent of total	Number	Percent of total	Percent of all farms	Total

FARM CHARACTERISTICS BY VALUE OF PRODUCTS

169

AND IMPLEMENTS AND MACHINERY, CLASSIFIED BY TOTAL VALUE OF FARM
AND DIVISIONS: 1939—Continued

and adjusted to agree with the recorded totals. See text. For comparable figures by States for farms with "under \$10,000" and "\$10,000 and over" total value of farm statistics on other specified farm expenditures, see tables 1 and 9.

EXPENDITURES FOR LIMING MATERIALS ^a -Cont.							EXPENDITURES FOR FEED							EXPENDITURES FOR IMPLEMENTS AND MACHINERY ^b						
Quantity (tons)-Cont.		Amount expended (dollars)				Farms reporting			Amount expended (dollars)				Farms reporting			Amount expended (dollars)

CENSUS OF AGRICULTURE: 1940

TABLE 2.—EXPENDITURES FOR COMMERCIAL FERTILIZER, LIMING MATERIALS, FEED, PRODUCTS,¹ FOR THE UNITED STATES

[Bold face figures are the 1940 Census recorded totals for all farms; all other entries are based upon a 2-percent sample of the reports for the individual farms, expanded products, based upon complete tabulations, see table 6. For

DIVISION AND VALUE GROUP	EXPENDITURES FOR COMMERCIAL FERTILIZER ²										EXPENDITURES FOR LIMING MATERIALS ³			
	Farms reporting			Quantity (tons)			Amount expended (dollars)				Farms reporting		Quantity (tons)	
	Number	Percent of total	Percent of all farms	Total	Average per farm reporting	Percent of total	Total	Average per farm reporting	Average per ton	Percent of total	Number	Percent of total	Percent of all farms	Total

¹ Value of farm products sold, traded, or used by farm households.

² Includes quantities for which the farm operator reported no expenditure or expenditure for freight only, as where fertilizer was furnished in connection with agricultural programs.

³ Includes quantities for which the farm operator reported no expenditure or expenditure for freight only, as where liming materials were furnished in connection with agricultural programs; or expenditures for digging, grinding, or burning, only, as where marl or lime were obtained from deposits or quarries on the farms where used. Some of the lime reported was used for purposes other than for soil improvement, such as in dairy barns and for spraying and dusting.

FARM CHARACTERISTICS BY VALUE OF PRODUCTS

171

AND IMPLEMENTS AND MACHINERY, CLASSIFIED BY TOTAL VALUE OF FARM

AND DIVISIONS: 1939—Continued

and adjusted to agree with the recorded totals. See text. For comparable figures by States for farms with "Under \$10,000" and "\$10,000 and over" total value of farm statistics on other specified farm expenditures, see tables 1 and 3.

⁴Includes expenditures for automobiles, tractors, motortrucks, and trailers.

^bLess than one-tenth of 1 percent.

^cDigitals marked with asterisks have a coefficient of variation of approximately 10 percent or more, and may, therefore, be subject to sampling errors greatly in excess of that amount. See text.

CENSUS OF AGRICULTURE: 1940

TABLE 3.—EXPENDITURES FOR GASOLINE, DISTILLATE, KEROSENE, AND OIL; AND FOR BUILDING MATERIALS; CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS,¹ FOR THE UNITED STATES AND DIVISIONS: 1939

[Bold face figures are the 1940 Census recorded totals for all farms; all other entries are based upon a 2-percent sample of the reports for the individual farms, expanded and adjusted to agree with the recorded totals. See text. For comparable figures by States for farms with "Under \$10,000" and "\$10,000 and over" total value of farm products, based upon complete tabulations, see table 6. For statistics on other specified farm expenditures, see tables 1 and 2.]

¹Value of farm products sold, traded, or used by farm households.

²Includes expenditures for lumber, roofing materials, hardware, cement, paint, fencing material, etc.

³Less than one-tenth of 1 percent.

⁴Figures marked with asterisks have a coefficient of variation of approximately 10 percent or more, and may, therefore, be subject to sampling errors greatly in excess of that amount. See text.

FARM CHARACTERISTICS BY VALUE OF PRODUCTS

173

TABLE 3.—EXPENDITURES FOR GASOLINE, DISTILLATE, KEROSENE, AND OIL; AND FOR BUILDING MATERIALS; CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS,¹ FOR THE UNITED STATES AND DIVISIONS: 1939—Con.

[Bold face figures are the 1940 Census recorded totals for all farms; all other entries are based upon a 2-percent sample of the reports for the individual farms, expanded and adjusted to agree with the recorded totals. See text. For comparable figures by States for farms with "Under \$10,000" and "\$10,000 and over" total value of farm products, based upon complete tabulations, see table 6. For statistics on other specified farm expenditures, see tables 1 and 2.]

DIVISION AND VALUE GROUP ²	EXPENDITURES FOR GASOLINE, DISTILLATE, KEROSENE, AND OIL					EXPENDITURES FOR BUILDING MATERIALS ³

¹Value of farm products sold, traded, or used by farm households.

²Includes expenditures for lumber, roofing materials, hardware, cement, paint, fencing material, etc.

³Less than one-tenth of 1 percent.

⁴Figures marked with asterisks have a coefficient of variation of approximately 10 percent or more, and may, therefore, be subject to sampling errors greatly in excess of that amount. See text.

CENSUS OF AGRICULTURE: 1940

TABLE 3.—EXPENDITURES FOR GASOLINE, DISTILLATE, KEROSENE, AND OIL; AND FOR BUILDING MATERIALS; CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS,¹ FOR THE UNITED STATES AND DIVISIONS: 1939—Con.

[**Bold face figures** are the 1940 Census recorded totals for all farms; all other entries are based upon a 2-percent sample of the reports for the individual farms, expanded and adjusted to agree with the recorded totals. See text. For comparable figures by States for farms with "under \$10,000" and "\$10,000 and over" total value of farm products, based upon complete tabulations, see table 6. For statistics on other specified farm expenditures, see tables 1 and 2.]

CENSUS OF AGRICULTURE: 1940

TABLE 4.—EXPENDITURES FOR HIRED LABOR, CLASSIFIED BY TOTAL

[All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by geographic divisions, based upon a 2-percent sample for farms "Under \$10,000" classified by total value]

CENSUS OF AGRICULTURE: 1940

TABLE 4.—EXPENDITURES FOR HIRED LABOR, CLASSIFIED BY TOTAL

[All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by geographic divisions, based upon a 2-percent sample for farms "Under \$10,000" classified by total value]

DIVISION OR STATE AND VALUE GROUP	EXPENDITURES FOR ANY HIRED LABOR ¹						EXPENDITURES FOR LABOR HIRED BY THE MONTH ²

CENSUS OF AGRICULTURE: 1940

TABLE 4.—EXPENDITURES FOR HIRED LABOR, CLASSIFIED BY TOTAL

[All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by geographic divisions, based upon a 2-percent sample for farms "Under \$10,000" classified by total value.

DIVISION OR STATE AND VALUE GROUP	EXPENDITURES FOR ANY HIRED LABOR ^a						EXPENDITURES FOR LABOR HIRED BY THE MONTH ^b

TABLE 4.—EXPENDITURES FOR HIRED LABOR, CLASSIFIED BY TOTAL

[All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by geographic divisions, based upon a 2-percent sample for farms "Under \$10,000" classified by total value.

DIVISION OR STATE AND VALUE GROUP	EXPENDITURES FOR ANY HIRED LABOR ¹						EXPENDITURES FOR LABOR HIRED BY THE MONTH ²

TABLE 5.—EXPENDITURES FOR COMMERCIAL FERTILIZER, LIMING MATERIALS, FEED, AND IMPLEMENTS
 [All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by geographic divisions, based upon a 2-percent sample, for farms "Under \$10,000" classified by total value]

FARM CHARACTERISTICS BY VALUE OF PRODUCTS

187

AND MACHINERY, CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS,¹ BY DIVISIONS AND STATES: 1939

Subtractions; hence they include data for unclassified farms and for farms with no farm products sold, traded, or used by farm households. For comparable figures by value of farm products, see table 2. For statistics on other specified farm expenditures, see tables 4 and 6.]

CENSUS OF AGRICULTURE: 1940

TABLE 5.—EXPENDITURES FOR COMMERCIAL FERTILIZER, LIMING MATERIALS, FEED, AND IMPLEMENTS AND
 All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by geographic divisions, based upon a 2-percent sample, for farms "Under \$10,000" classified by total value

FARM CHARACTERISTICS BY VALUE OF PRODUCTS 189

MACHINERY, CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS,¹ BY DIVISIONS AND STATES: 1939—Continued
 subtraction; hence they include data for unclassified farms and for farms with no farm products sold, traded, or used by farm households. For comparable figures by
 of farm products, see table 2. For statistics on other specified farm expenditures, see tables 4 and 6.]

EXPENDITURES FOR LIVING MATERIALS ^a —Continued						EXPENDITURES FOR FEED						EXPENDITURES FOR IMPLEMENTS AND MACHINERY ^a

CENSUS OF AGRICULTURE: 1940

TABLE 5.—EXPENDITURES FOR COMMERCIAL FERTILIZER, LIMING MATERIALS, FEED, AND IMPLEMENTS AND
[All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by geographic divisions, based upon a 2-percent sample, for farms "Under \$10,000" classified by total value]

TABLE 5.—EXPENDITURES FOR COMMERCIAL FERTILIZER, LIMING MATERIALS, FEED, AND IMPLEMENTS AND
[All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by geographic divisions, based upon a 2-percent sample, for farms "Under \$10,000" classified by total value]

^aValue of farm products sold, traded, or used by farm households.

^bIncludes quantities for which the farm operator reported no expenditure or expenditure for freight only, as where fertilizer was furnished in connection with agricultural programs. There were a considerable number of such reports in Vermont.

^cIncludes quantities for which the farm operator reported no expenditure or expenditure for freight only, as where liming materials were furnished in connection with agricultural program; or expenditures for digging, grinding, or burning, only, as where marl or lime were obtained from deposits or quarries on the farms where used. Some of the lime reported was used for purposes other than for soil improvement, such as in dairy barns and for spraying and dusting.

FARM CHARACTERISTICS BY VALUE OF PRODUCTS 195

MACHINERY, CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS,¹ BY DIVISIONS AND STATES: 1939—Continued
 [Subtraction; hence they include data for unclassified farms and for farms with no farm products sold, traded, or used by farm households. For comparable figures by state, see table 2. For statistics on other specified farm expenditures, see tables 4 and 6.]

⁴ Includes expenditures for automobiles, tractors, motortrucks, and trailers.

⁵ Less than one-tenth of 1 percent.

CENSUS OF AGRICULTURE: 1940

TABLE 6.—EXPENDITURES FOR GASOLINE, DISTILLATE, KEROSENE, AND OIL; AND FOR BUILDING MATERIALS;
CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS,¹ BY DIVISIONS AND STATES: 1939

[All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by subtraction; hence they include data for unclassified farms and for farms with no farm products sold, traded, or used by farm households. For comparable figures by geographic divisions, based upon a 2-percent sample for farms "Under \$10,000" classified by total value of farm products, see table 3. For statistics on other specified farm expenditures, see tables 4 and 5.]

DIVISION OR STATE AND VALUE GROUP	EXPENDITURES FOR GASOLINE, DISTILLATE, KEROSENE, AND OIL						EXPENDITURES FOR BUILDING MATERIALS ²

¹ Value of farm products sold, traded, or used by farm households.

² Includes expenditures for lumber, roofing materials, hardware, cement, paint, fencing material, etc.

CENSUS OF AGRICULTURE: 1940

TABLE 6.—EXPENDITURES FOR GASOLINE, DISTILLATE, KEROSENE, AND OIL; AND FOR BUILDING MATERIALS;
CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS¹ BY DIVISIONS AND STATES: 1939—Continued

[All of the figures in this table represent totals for all farms in each value group classification. The figures for the "Under \$10,000" value group were secured by subtraction; hence they include data for unclassified farms and for farms with no farm products sold, traded, or used by farm households. For comparable figures by geographic divisions, based upon a 2-percent sample for farms "Under \$10,000" classified by total value of farm products, see table 3. For statistics on other specified farm expenditures, see tables 4 and 5.]
